by

The Standards Sub-Committee of
the Technical Information Panel of AGARD

This AGARDograph has been prepared at the request of the
Technical Information Panel of AGARD.

The Mission of AGARD

According to its Charter, the mission of AGARD is to bring together the leading personalities of the NATO nations in the fields of science and technology relating to aerospace for the following purposes:

— Recommending effective ways for the member nations to use their research and development capabilities for the common benefit of the NATO community;

— Providing scientific and technical advice and assistance to the Military Committee in the field of aerospace research and development (with particular regard to its military application);

— Continuously stimulating advances in the aerospace sciences relevant to strengthening the common defence posture;

— Improving the co-operation among member nations in aerospace research and development;

— Exchange of scientific and technical information;

— Providing assistance to member nations for the purpose of increasing their scientific and technical potential;

— Rendering scientific and technical assistance, as requested, to other NATO bodies and to member nations in connection with research and development problems in the aerospace field.

The highest authority within AGARD is the National Delegates Board consisting of officially appointed senior representatives from each member nation. The mission of AGARD is carried out through the Panels which are composed of experts appointed by the National Delegates, the Consultant and Exchange Programme and the Aerospace Applications Studies Programme. The results of AGARD work are reported to the member nations and the NATO Authorities through the AGARD series of publications of which this is one.

Participation in AGARD activities is by invitation only and is normally limited to citizens of the NATO nations.

Foreword

The purpose of this Manual is to describe in a series of separately-published Volumes the basic documentation practices which are involved in the initial setting up, and subsequent operation of an Information-Library Organisation to provide defence-aerospace scientific and technical information services.

The manual has been planned by the AGARD Technical Information Panel and consists of:

- four volumes comprising twelve sections in all, each prepared by a well-known expert in the field.

- a fifth volume containing a comprehensive index.

- an addendum comprising a reference list of International, NATO, European and National Information Standards.

The publication layout is given on the following page(s).

Avant-Propos

Les differents volumes de ce manuel, qui sont edités separément, fournissent la description des procedures documentaires de base demandées pour la creation et l'exploitation d'une informathèque, prestataire de services d'information techniques et scientifiques auprès de la communauté aerospatiale militaire

Ce manuel a été réalisé par le Panel AGARD de l'Information Technique. Il consiste en:

- quatre volumes comprenant douze fascicules en tout, chacune rédigée par un specialiste eminent.

- un cinquième volume contenant un index général.

- un addendum comprenant la liste officielle des t..rmes Internationales, OTAN, Europeennes et Nationales relatives aux activités de l'information.

Le plan de la publication est donné au verso.

Col Piero Marconi
Chairman, Standards Sub-Committee,
AGARD Technical Information Panel

Introduction to List of Standards

The application of suitable standards is essential for effective information work, particularly when setting up information services or expanding them. Whenever possible, existing standards should be adopted to reduce individual effort and to guarantee maximum compatibility.

This list of standards has been grouped according to the field of application for easy reference. It is recommended that the standards should be considered as having the following priority:

- International
- NATO
- European
- National

The list is not exhaustive and will receive regular updates. Any proposals for alterations and additions should be addressed to:

TIP Executive
Advisory Group for Aerospace Research and Development
7 rue Ancelle — 92200 Neuilly-sur-Seine
France

Introduction à la Liste des Normes

La mise en application de normes adéquates est d'une importance vitale pour l'industrie de l'information, et en particulier lors de la création ou de l'expansion de centres serveurs. Dans la mesure où des normes existent, elles doivent être adoptées afin de minimiser la charge de travail et de garantir le maximum de compatibilité.

La liste des normes a été établie par domaine d'application pour faciliter les recherches. Les différentes normes doivent être consultées selon l'ordre de priorité suivante:

- Normes Internationales
- Normes OTAN
- Normes Européennes
- Normes Nationales

Cette liste n'est pas exhaustive. Elle sera mise à jour régulièrement. Veuillez adresser toute proposition de modification ou de rajout a:
